NIKE Better Quality **NIKE** Better Service

ABOUT THE

Our story began in 2000, THE is headquartered in Beijing, China, with three holding subsidiaries including:

THE FREY [HongKong] Co., Ltd

THE ESSENCE [BEIJING] Co., Ltd

THE UNIVERSAL Chemical Cooperation Limited

Following the footprint of concept “ THE Better Quality, THE Better Service ”, THE specializes in Composite ingredients & Cosmetics raw materials & Natural ingredients to industries including but not limited to food, feed and personal care etc.. Upon its commitment and implementation with the philosophy of regime “ Professional, Rigorous, Meticulous ”, THE clings to endow better solutions to INGREDIENTS over decades for worldwide partners .

THE FIRST DISTRIBUTOR WITH THREE SYSTEM CERTIFICATIONS IN CHINA

THE ESSENCE [BEIJING] Co., Ltd. has passed the certifications of FSSC 22000, BRCaGS [A&B], and ISO 9001 systems. It has become the first distributor in China that simultaneously holds the certifications of these three systems.

THE Better Quality THE Better Service

THE ADVANTAGE

THE Service advantage

Service is always one of the most distinguished advantages in THE, which is mainly reflected in the fact that any decision is made with a keen focus on the optimal fit between product quality and product profit margin delivered to customers. Our main goal is to maximize customer satisfaction.

THE Hardware advantage

THE is equipped with basic inspection and analysis laboratories, R&D application laboratories and multiple pilot bases. The R&D innovation center has complete analysis, detection and application simulation equipment, including physical and chemical detection and analysis equipment, texture optimization evaluation equipment, food processing technology simulation equipment and kitchen equipment.

THE Talent advantage

A professional R&D team with innovative formulation service upon better solutions to ingredients shall be available anytime by our THE's decades-of-experienced experts and know-how specialists for our esteemed partners and customers worldwide.

THE Technological advantage

Based on its comprehensive capabilities and technological strength, THE offers comprehensive and optimally adaptable solutions in every aspect, from raw material selection, assessment of compliance with relevant laws and regulations, to in-depth involvement in technological research, optimization of application formulas, and even marketing channels.

THE focuses on providing solutions in markets such as water retention and quality improvement for meat products and seafood products, stable suspension for beverages, sucrose substitution in food, food preservation, pet food solutions, and quality improvement for flour products. Provide customized products/powdered products/granular products/liquid products.

Timely shipping and warehousing logistics

THE uses a sophisticated supply chain network to reduce transportation and handling costs, maximizing our competitiveness. And also, we have independent distribution warehouses for quick delivery at the ports. Stocks of most conventional products are available, and timely door - to - door delivery services can be provided on due time.

Documents support

In the currently widespread paperless office environment, THE, relying on its speedy order processing and powerful office system, generally finishes the work of order confirmation, proforma invoice preparation, and shipment details in a very short time.

SERVICE

THE NOVOCHEM GROUP

Customer interests consideration

While ensuring the on-time delivery of products, THE will conduct quality control starting from the production and maintain a whole monitoring system from raw material processing, production line manufacturing to the final packaging to guarantee product quality.
